Goals and Objectives: - Increase awareness among students and university staff about SDGs, environmental issues, and social responsibility. - Develop skills for implementing sustainable development principles in practical activities. - Promote integration of sustainable approaches into the university's educational and research processes.

Description: This plan aims to establish a system of regular training for KazNARU students and staff in sustainable development, increasing awareness of the importance of environmental and social aspects and integrating these principles into education and daily activities.

The results of the events will be published on the university's official resources to inform a wide audience and strengthen the university's image as a national center for advancing SDGs, environmental responsibility, and social impact. The program will also contribute to improving the university's QS WUR Sustainability ranking.
